

AROUND CAMPUS

Students and Faculty

MIT enrolled (<https://facts.mit.edu/enrollment-statistics>) 11,920 students in 2022–2023, including 4,576 undergraduates and 7,344 graduate students. These MIT students came from all 50 states, the District of Columbia, four territories, and 136 foreign countries. The broad international student representation of 3,478 students made up 11% of the undergraduate and 41% of the graduate population.

In the same year, there were 1,089 faculty (<https://facts.mit.edu/employees/faculty>) members in MIT's professorial ranks, including 300 women. The total teaching staff numbered 2,109. Most faculty members at MIT teach both undergraduate and graduate students. Undergraduates frequently register for graduate classes, and many undergraduates and graduate students participate, often together, in advanced research.

The confluence of ages, disciplines, and nationalities so characteristic of MIT brings together students and teachers, biologists and architects, humanists and engineers, young and old, and deeply influences the life and experience of every member of the academic community. The result is an academic environment with a strong focus on excellence and a diverse range of interests.
